Pursuant to the agreement, Savannah will develop renewable energy projects that will power Doba Oil Project, and the towns of Moundou and Doba, located in Southern Chad, along with the capital city N’Djamena.

The company is also responsible for a second project that involves development of up to 100MW of solar and wind projects to power the country"s capital city, N’Djamena.

Savannah Energy chief executive officer Andrew Knott said: "I am delighted to announce the Centrale Solaire de Kom? and the Centrales d’Energie Renouvelable de N’Djamena projects.

"Both of these represent a major vote of confidence in Chad by Savannah and have the potential to contribute to a transformative change in the country’s GDP over the course of the coming years, as well as bringing the significant quality of life benefits associated with access to regularised power to the regions in which the Projects are situated.
