Ottawa electricity rates

We understand that some of our customers may be affected by the Canada Post service disruption where mail delivery could be delayed. Take steps now to ensure continued access to your Hydro Ottawa bill and account information online. [Learn more](#)

Residential, small business and net metering customers billed under the RPP can choose the electricity rate that best meets their energy needs and lifestyle: Time-of-use, Tiered or Ultra-low overnight prices.

Under the Time-of-use pricing, you pay a different rate for electricity depending on the time of day and day of the week you consume it. Time-of-use has three periods: on-peak (when energy demand and cost is high), mid-peak (when energy demand and cost is moderate) and off-peak (when energy demand and cost is low).

Similar to Time-of-use rates, with Ultra-low overnight, the price depends on when you use electricity. Ultra-low overnight has an additional price period, a different set of rates and offers an ultra-low overnight rate in exchange for a higher on-peak rate.

With Ultra-low overnight pricing you are charged according to the day of the week and time of day that you use electricity. There are four price periods: on-peak, mid-peak, weekend off-peak, and ultra-low-overnight. The Ultra-low overnight plan sets a very low price for the overnight period, however, the on-peak price is significantly higher.

Customers under Tiered rates pay one set rate for the electricity they consume up to a predetermined kilowatt-hour (kWh) threshold each month. Once customers exceed the monthly threshold, they are billed at a higher rate per kWh for all additional electricity consumed in that month.
