PEG Africa is a leader in deploying and financing solar to households and SMEs in West Africa. Via its PAYG financing model, it enables customers to replace their perpetual spending on poor-quality polluting fuels such as kerosene and diesel with solar energy. PEG is currently serving 400,000 daily users in Ghana, Cote d'Ivoire and Senegal, and has recently expanded into solar water irrigation and bigger solar power systems.

The funding from ElectriFI is subordinated junior debt and will be used for growth in PEG's existing markets. ElectriFI, the Electrification Financing Initiative, is funded by the European Union and managed by the EDFI Management Company, established by 15 European Development Finance Institutions.

"PEG has almost doubled in size every year since 2015," said CEO Hugh Whalan, "and the fact we are now able to raise a significant amount of our funding in debt demonstrates that our approach is financially sustainable. We are delighted to work with ElectriFI to further accelerate our growth."

"With 82.000 direct new connections by the end of 2019, together adding not less than 1.7 MW with Solar Home Systems, ElectriFI's investment in PEG will strongly contribute to improving quality of life through renewable energy in the markets it operates in," he said.

"ElectriFI's innovative financing is catalysing the financing by UK DFI, CDC group, who together with SunFunder, provided a US\$15 million senior secured debt facility in local currency earlier in 2019."

trntI agree for my personal data, provided via map API calls, to be processed by the API provider, for the purposes of geocoding (converting addresses to coordinates), reverse geocoding andtgenerating directions.rn

rntSome visual components of WP Go Maps use 3rd party libraries which are loaded over the network. At present the libraries are Google Maps, Open Street Map, jQuery DataTables and FontAwesome. When loading resources over a network, the 3rd party server will receive your IP address and User Agent string amongst other details. Please refer to the Privacy Policy of the respective libraries for details on how they use data and the process to exercise your rights under the GDPR regulations.rn

rntWP Go Maps uses jQuery DataTables to display sortable, searchable tables, such as that seen in the Advanced Marker Listing and on the Map Edit Page. jQuery DataTables in certain circumstances uses a cookie to save and later recall the "state" of a given table - that is, the search term, sort column and order and current page. This data is held in local storage and retained until this is cleared manually. No libraries used by WP Go Maps transmit this information.rn
