

## Plug-in electric vehicles phevs bolivia

This growth is a direct result of the Bolivian government's tax incentives. 1,893 such vehicles were brought into the country in 2023, showcasing a clear shift towards sustainable transportation.

From July 2021 to December 2023, 3,388 electric and hybrid vehicles were imported. This initiative aligns with Bolivia's strategy to improve environmental conditions and enhance energy efficiency.

Moreover, the government's efforts extended beyond tax benefits. They installed electric charging stations in major cities like La Paz, Cochabamba, Santa Cruz, and Oruro.

The plan includes expanding this network nationwide in the coming years. Financial institutions have also played a role by offering accessible loans for purchasing these vehicles.
