

## Plug-in electric vehicles phevs croatia

Member States are obliged to adopt National Policy Framework targets and report them to the European Commission. NPF targets are then set for the deployment of alternative fuels infrastructure in the respective Member State.

Pursuant to Article 3.1 of the Alternative Fuels Infrastructure Regulation (AFIR), Member States are mandated to facilitate the deployment of publicly accessible recharging stations for light-duty vehicles, commensurate with the adoption rates of electric vehicles within their territories. Specifically, AFIR dictates the following annual cumulative power output targets for recharging infrastructure:

The target power output for each Member State (denoted as Member State X) is computed by summing the products of the number of registered BEVs and PHEVs with their respective power output requirements:

The achievement of these targets is assessed by comparing the actual power output available through public infrastructure to the calculated target output, facilitating transparent and objective monitoring of progress towards AFIR compliance.

In accordance with Article 3 of Directive 2014/94/EU (Alternative Fuels Infrastructure Directive), Member States were obliged to adopt National Policy Frameworks (NPFs) and report them to the European Commission by 18 November 2016. NPFs should include national targets for the deployment of alternative fuels infrastructure in the respective Member State.

Under the reporting obligations of the Directive, the Commission is tasked with assessing the overall relevance and effectiveness of NPFs and their coherence at Union level. The assessment of the deployment of infrastructure along the TEN-T network is of particular relevance.

For that reason, EAFO is now publishing the integral text of the National Policy Frameworks including an English translation where necessary, and will track progress towards meeting the targets established therein. We also provide an overview of the most important features of the National Policy Frameworks.
