

Polycab solar inverter app

Polycab solar inverter app

The developer, Polycab India Limited, indicated that the app's privacy practices may include handling of data as described below. For more information, see the developer's privacy policy.

POLYCAB SOLAR is a free Android app developed by IGEN Tech that offers real-time remote monitoring and management of solar plants. The app allows users to monitor their solar plants remotely, view real-time and historical data of generation, consumption, storage battery, and more. Users can check the project condition and revenue anytime, anywhere.

One of the most significant features of this app is that it allows users to calculate the potential revenue of their rooftops by using meteorological data and national/local FIT databases. With this information, users can easily check the ROI and period of building plants, find a good system location, and plan accordingly. POLYCAB SOLAR is a must-have app for anyone who wants to manage their solar plants efficiently and effectively.

We'd like to highlight that from time to time, we may miss a potentially malicious software program. To continue promising you a malware-free catalog of programs and apps, our team has integrated a Report Software feature in every catalog page that loops your feedback back to us.
