## Powerwall lifepo4

This is a Lithium ion 10kwh LiFePo4 Powerwall. With 48v 200Ah built in High quality grade A prismatic LFP cells 16S2P. This 10 kwh LiFePo4 powerwall included smart BMS and built in high quality BMS. A resistor is also built in on the BMS. Front LCD display shows all details information of battery state. This is a plug-n-play back up solar system 48v lifepo4 lithium pack 10kwh battery home powerwall.

CMX lifepo4 48v 200ah lifepo4 powerwall battery (LFP-lithium iron phosphate) is an environmental-friendly backup power storage bank system. It is made of cathode lithium ion LiFePo4 materials, A grade prismatic battery cell and BMS (battery management system) and processed by self-developed core technologies.

This bateria 10kwh lifepo4 48v 200ah Powerwall is a cheaper tesla powerwall alternative the latest HBESS battery system. It features high energy and power density, and of course a long lifespan. Its easiness of installation and expansion reflect the real requirements of the end users and strong technical capability. So far, it has served over 6000+ families.

The Powerwall battery is a home energy storage system that can store energy directly from the grid, or it can store electricity generated by renewable energy sources such as wind and solar energy. CMX powerwall available in 24V and 48V backup batteries, with individual storage capacities ranging from 5kWh to 10kWh, to meet the power needs of private homes and small businesses.

Coremax developed this 48v 200ah deep cycle battery for home energy storage users. No matter you are build a trid tie or offgrid system. Coremax 48v 200Ah powerwall could be a best choice. The rated energy 10kwh, can support max 16pcs connect in parallel. So, if you are build 10kwh, 15kwh, 20kwh, 30kwh or even more energy powerwall. Coremax 48 volt powerwall is the right choice.

1. Powerwall 10 kwh new energy power is acceptable, and making full use of clean energy. The output power of solar energy and wind energy can be effectively smoothed. The impact to the power grid and users, which is consulted by intermittency of new energy can be effectively overcome.

3. 10 kwh lifepo4 48v 200ah power wall storage bank Saving electricity for users by peak-shift. Under the price of peak valley, if the power consumption is big in the rash hour, this system can help to save expenditure by storing electricity during the electricity troughs, and using in the peak time.

Hello Mr. Hussain, The model is 51.2V160Ah, max charge and discharge current is 320A, that is what 2C means. 2 times the nominal capacity, 320A equals 2 times 160. It has a higher charge and discharge current, it may be used in EVs or LSVs. Unlike lead-acid car batteries, it can also be used for energy storage. If the battery is not broken, I think it already has the BMS, and you can use it in a home solar system. It is recommended to figure out the BMS functions and settings before use and make sure it is working properly. Andy
