

Production of electricity from renewable sources

Production of electricity from renewable sources

Wind and hydropower accounted for over two-thirds of the total electricity generated from renewable sources (37.5% and 29.9%, respectively). The remaining one-third of electricity came from solar (18.2%), solid...

Renewables: what share of electricity comes from renewables? "Renewables" combine multiple electricity sources, including hydropower, solar, wind, geothermal, biomass, and wave and tidal. This interactive map shows...
