Recycle batteries near me

One of our larger achievements is the planting of our 3 carbon forests which has put over 43,000 new trees into the ground. this has led us to become a carbon neutral-company since 2018 and in the future we're looking towards reducing carbon as well as offsetting.

We are also committed to handling waste responsibly and are able to perform nationwide waste collections with high rates of recycling. Each finished job gets its own waste transfer note so you know for sure your waste has been dealt with properly.

With a large in-house fleet of over 100 vehicles and almost 300 directly-employed staff, you can trust us to handle your rubbish responsibly. We complete thousands of jobs every week for homes, businesses and we work directly for some of the UK's best known brands.

Our services are available across the UK, from our "Man & Van" collections to our skip hire service. Our teams are not based in one location but are instead dotted around the UK. This allows us to provide an efficient on-demand service, regardless of where you are in the nation.

Our booking process has been streamlined to make sure that booking a Clearabee service can be completed easily and without friction. You can simply add the service you require within our booking journey and then fill in your details.

For our quickest waste removal you should use our "Man & Van" service. In some cases this service can be at your door to collect your waste on the very same day of your enquiry. Once booked, we'll keep you updated at every step with confirmations, texts to know when we're near and waste transfer notes once your collection has been responsibly disposed of.

You do not need to be at the premises on the day of your collection. If you plan on being out, please ensure that the waste to be collected is easily accessible. You can send us photos ahead of your collection to give us more information. We can also collect items from inside your home, but in these cases you will have to be in to allow us access to collect the waste.

We usually quantify waste in cubic yards, if you are unsure of how much waste you have you can try our Waste Calculator. You can create a basket of waste and the calculator will produce the total cubic yards, the weight and recommend the best services. Alternatively, you can get in contact with our team who will happily help you.

Using a responsible waste handler such as ourselves is important when removing waste. At Clearabee, we have been professionally and responsibly disposing of waste for years and will average over 100,000 jobs per

annum. We have high rates of recycling and have also become a carbon-neutral company through our carbon forests. This means you can rest easy with a peace of mind that your waste will be handled responsibly when booking with Clearabee.
