

Renewable energy growth bolivia

Renewable energy growth bolivia

The history of renewable energy in Bolivia is not very long, as many of its significant developments unfolded a few years ago. However, that has not stopped the country from achieving important milestones in its transition to renewable energy during the said short period.

Project Description: The objective of the project is to expand access to electricity in underserved areas of Bolivia, within the national decentralized framework. More than 27,000 households will benefit as well as 130 schools and health centers.
