

Renewable energy storage nuku alofa

Tonga's capital, Nuku'alofa, is home to critical infrastructure and services, such as government offices, the country's main port, hospitals, commercial hub, schools, water, and power utilities. The existing urban infrastructure is insufficient to meet the demands of the current urban population.

There has been significant migration to Nuku'alofa from the outer islands. The urban growth has not been matched by the provision of, or improvement in the delivery of, urban services. The World Bank (ADB) and other development partners have been supporting Tonga Power Limited (TPL) to deliver a program to improve and upgrade and expand the electricity network in the capital.

This project will conduct a detailed gender analysis of the Nuku'alofa Network Upgrading Project (NNUP) to ensure the project can be categorized as "effective gender mainstreaming." A gender action plan will be prepared and gender design features integrated in the project design and documents.

[[pacificdata](#)] ([pacificdata](#)) - the Pacific Data Hub - is the central repository of open data and knowledge products about the Pacific region. Anyone can access the public data on the Pacific Data Hub. You are encouraged to search, reuse and share the data on [pacificdata](#).

The Pacific Data Hub holds a large and diverse collection of data, data insights, publications, and knowledge products on the Pacific across key sectors, including population statistics, fisheries, geoscience, agriculture, aquaculture, energy, education, human rights, climate change, and oceans, and it continues to grow.

While the intention is for the Pacific Data Hub to become a multi-stakeholder-owned and managed platform, it is currently a product of the Pacific Community (SPC), and as such is governed by SPC's internal documents.

Powerpoint presentation on the plan to open a Pacific Centre for RE & EE at Nuku'alofa, Tonga on 21 June 2016. This is a joint partnership between SPC, Tonga Government, PICTs, UNIDO, SIDS Dock and Development Partners to accelerate the deployment of feasible renewable energy and energy efficient technologies throughout the PICTs through investment and business promotion.
