Romania energy storage for microgrids

Romania energy storage for microgrids

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities - wind, solar, or hydro.

Under the scheme, grants will be available for battery storage systems built alongside existing renewable energy plants - wind, solar or hydro. The storage capacity should annually absorb at least 75% of the energy produced by the renewable energy facility to which it is directly connected.

Your personal data will only be disclosed or otherwise transmitted to third parties for the purposes of spam filtering or if this is necessary for technical maintenance of the website. Any other transfer to third parties will not take place unless this is justified on the basis of applicable data protection regulations or if pv magazine is legally obliged to do so.

You may revoke this consent at any time with effect for the future, in which case your personal data will be deleted immediately. Otherwise, your data will be deleted if pv magazine has processed your request or the purpose of data storage is fulfilled.
