

Rome microgrid applications

The Rome Third Industrial Revolution Master Plan was prepared by the Jeremy Rifkin Group--comprised of 100 of the world's leading renewable energy companies, construction companies, architectural firms, IT companies, power and utility companies and transport and logistic companies, including Philips, IBM, Schneider Electric, Arup, Q-Cells, KEMA, Adrian Smith + Gordon Gill, etc.--in collaboration with Mayor Alemanno, Professor Livio de Santoli, Energy Coordinator for the Mayor, and more than 40 experts from the City of Rome.

In June 2007, the European Parliament formally endorsed a four-pillar, long-term sustainable economic development plan to transition the EU to a Third Industrial Revolution, with the aim of making Europe the flagship for a green economic recovery for the world. The Third Industrial Revolution plan is now being implemented by various agencies within the European Commission, as well as in the 27 member states.

The announcement of the Third Industrial Revolution Master Plan by Mayor Gianni Alemanno is the first comprehensive economic initiative of its kind and, puts Rome at the forefront of initiatives being pursued across Europe to reach the 20-20-20 by 2020 EU mandate and achieve the long-term goal of realizing the Lisbon Strategy to make the EU the most competitive economy in the world.”
