SMKSOLAR TECHNOLOGY NIGERIA LIMITED

Reach out to us anytime at Customer Support: +234 9027261739 or fill out the contact form. Your feedback and questions are always welcome, and we are here to ensure you have the best experience with our solar solutions.

Our presence spans multiple locations across Nigeria, ensuring that we are always within reach to serve you better. Visit our head office in Lagos or any of our branches nationwide for top-notch solar products and exceptional service.

Installing a battery could reduce your electricity bills, especially if you're on a time-of-use tariff such as Economy 7. You could be charging on cheap overnight electricity and using the battery during the expensive hours.

Solar panels are a great way to generate electricity during the day, but they don't work at night when you need energy the most. Installing a battery can help you make the most of the energy your panels produce. Without a battery, you'll have to rely on the national grid for electricity at night, which can be expensive. However, with a battery, you can store any excess energy generated during the day and use it at night when you need it most. This will help you reduce your reliance on the grid and save money on your electricity bills.
