

San diego gas

San diego gas

With an outdoor playground like ours - coastline, lagoons, foothills, mountains and deserts- there's so much to treasure and protect. Good energy powers The San Diego Zoo Wildlife Alliance's vital conservation work to safeguard the future for animals, plants and their habitats, both globally and in our own backyard.

The good energy we deliver enables Moms Pie House to produce the high volume of pies needed to meet demand during their busy season - also a time of year known for hot, dry and windy weather conditions in San Diego's backcountry. Learn more about how undergrounding power lines in Julian is providing businesses with peace of mind that they can operate safely without the constant threat of weather-related power outages.

Everyone brings good energy to our community, and together we can build a healthier, stronger Southern California. SDG& E believes in the power to cultivate a community where everyone thrives. That's why we've invested \$10 million in charitable grants to local nonprofits to advance their work in housing stability and food security - to provide rental assistance, reliable access to healthy food and nutrition, improve access to public assistance programs and more.

From Carlsbad to Costa Mesa, Pechanga Arena to Petco Park, the San Diego and Orange County regions bring an energy all their own. We're committed to powering the community we've called home for more than 140 years, with climate action, economic development and much more.

As California pushes forward on its goal of net-zero greenhouse gas emissions by 2045, the community needs reliable energy distribution and equity for the underserved. If you bring the energy, we'll power the plans - today and for years to come.

Bring your energy, and we'll power it as cleanly and safely as possible. Creating tomorrow's lower-emissions communities depends on developing new technologies today and expanding the proven ones we already have.

From weekday shifts to weekend shindigs, energy means movement - and you deserve a provider that always moves forward. It takes constant work to develop the latest technologies so we can keep delivering power that's clean, reliable and safe. In doing that, we strive to ensure everyone in every community gets the same opportunities.

The safety of our customers, employees and the communities we serve is our highest priority. As our climate changes, bringing energy to the community safely takes continuous investment in hardening infrastructure, local partnerships, and the next generation of wildfire prevention technology.

San Diego Gas & Electric (SDG& E) provides electricity and natural gas to 3.6 million people in San Diego and southern Orange County. SDG& E is a subsidiary of Sempra Energy, a Fortune 500 energy company, and

San diego gas

was founded in 1881.

If you are a resident near San Diego or southern Orange County, SDG& E could be your utility company. Read on to learn more about SDG& E electricity and gas rates in your area.

Residential and commercial customers that do not sign up with an independent natural gas supplier will receive a default variable rate plan. The rates for this plan change monthly based on fluctuations in the energy market.

If you live in a deregulated market, you have the power to choose your own retail electric provider (REP) instead of going through your local utility company. This leads to a healthy competition in the market and helps consumers find cheap electricity rates.
