San salvador office energy storage

Energy feeds life, drives business and sustains growth, and that is what The AES Corporation has been doing for over 40 years. Nowadays, we operate in 14 countries transforming and innovating to create energy solutions that are both economic and environmentally viable.

Our customers are our core, hence our permanent efforts to incorporate innovative practices and state-of-the-art technology in all our operations. A labor force of over 9 thousand people works committed to safety, integrity and the highest standards in all markets where we operate.

At AES El Salvador our commitment to operate in a sustainable and environmentally responsible manner while creating value for the communities we serve is what drives us to innovate in our daily entrepreneurial work.

We develop modern digital tools and implement cutting-edge technology to transform and streamline our operations and electricity distribution services, providing an integral experience to our more than 1.56 million customers of AES CAESS, AES CLESA, AES EEO and AES DEUSEM.

Deliver affordable non-polluting energy is also our purpose. Through our B?sforo 100 MW solar photovoltaic project (AES-CMI partnership) with 10 plants of 10 MW each; from our solar plants Cuscatl?n Solar, Opico Power, AES Meanguera del Golfo - which combines an innovative solar generation system with battery storage - and Moncagua, of 10 MW, 5.2 MW, 1.3 MW, and 2.5 MW, respectively; as well as from our biogas-based power plant Nejapa, of 6 MW, we contribute to preventing the emission of about 304 thousand tons of CO₂ into the atmosphere each year.

We accompany the transition towards a sustainable energy future thanks to our Solutions business line, through which we implement important efficient public lighting projects for the industrial and commercial sectors, solar generation for self-consumption and energy storage, among others.

At AES El Salvador we respond to the challenge of creating shared value with the communities through our four axes of social responsibility: AES Environment, AES Education, AES Rural Energy and AES Woman, through which we approach initiatives aimed at protecting the environment and biodiversity, educating in the safe and efficient use of energy, and promoting the economic inclusion of the Salvadoran woman and the least favored families.

In an increasingly demanding and competitive world, at AES El Salvador, together with our people, our customers, communities and partners, we continue accelerating a safer, sustainable and intelligent energy future to improve the life of all Salvadorans.

Safety is at the core of everything we do. We always identify potential risks to our people, contractors, customers, partners and communities, and measure success by how safely we conduct our work together while contributing to a greener energy future.

We act with utmost integrity towards our people, contractors, customers, partners and communities, and hold the solutions we deliver together to global standards of excellence.

We work as one team across our business and with our people, contractors, customers, partners and communities. We meet changing customer needs with agility and have fun solving meaningful challenges as a team.

At AES El Salvador, we acknowledge Safety and Occupational Health, Environmental Protection and Customer Satisfaction as fundamental and strategic pillars of our management that allow us to achieve sustainable world-class results.
