Lead Battery Scrap Price. Lead Acid Batteries are the main source of lead scrap for recycling, accounting for nearly 90% of the total lead scrap available for recycling. Used automobile batteries account for almost 85% of the total lead acid battery scrap. The table below provides Lead Battery Scrap export prices as of mid-August, 2020.

Lead batteries can be found in many different places and can be scrapped for cash. The most common place you can find a lead battery is in a car. Lead battery prices depend on where you go to scrap them so check with your scrap yard for the current Lead Batteries Scrap Prices they are paying.

Lead Batteries are very heavy so if you have several of them, it may be worth it to ask your local scrap yard if they can come by and pick them up for you. Be sure to check the labels of the batteries to ensure that they are lead-acid, otherwise you may have a problem. There are a lot of larger lead batteries that come from backup battery systems that are very heavy, and they always need to be handled with caution because of the big weight.

ScrapIndex provides Statistical Market Intelligence by publishing current and historical in-depth market price data for hundreds of grades of secondary commodities. Current market prices are set out below for each grade of material tracked by ScrapIndex .

Historical Market Price reports are also available for each grade in the form of LTL (Less than Truck Load) and TL (Truck Load) reports . Reports are available in monthly, quarterly and annual formats. To view the available Historical Price Reports for a given grade of material, click on the LTL price or the TL price beside the grade name in the chart below.
