

Sell Used Solar Panels

Sell Used Solar Panels

Specializing in large commercial and utility-scale projects, solar farms, etc. We partner with solar installers, contractors, real estate developers around the world that want to recycle excess new and used / old solar panels and equipment.

Yes it is possible they may have some value. And in fact, you may be surprised at how much your used solar panel can be sold in the market in California, North Carolina, Florida, Arizona or Texas as long as they are in still good working condition.

The average value of a used solar panel is between \$0.05 to \$0.60 per watt, while brand-new solar panels cost \$0.70 to \$1.50 per watt on average. Of course, the actual value of your used solar panels can vary depending on state (like Texas, Florida or Arizona), the type of solar panel (i.e., mono-crystalline, thin-film, poly-crystalline, etc.), condition, and other factors.

Yes, if your used solar panels are still functional and are in relatively good condition, then they very well may have resale value in Arizona, Florida North Carolina etc., and you should be able to recoup some of your investment by selling them. Shipping and handling is usually the biggest expense that can offset any value so having a volume quantity of them to average out those costs is important.

As a general rule of thumb, solar panels that still have more than ten years of energy production can be resold in California or Texas. Most manufacturers guarantee their solar panels can generate power at 80% or higher for the first 20 years, with the average degradation rate of less than 1% per year.

If you are trying to find your own buyer or listing your used solar panels for sale on online marketplaces like eBay, finding your buyer can be quite challenging, not to mention you may need to stay compliant with environmental laws and other applicable regulations in your area.

Not to mention, if you somehow find a buyer, you'll need to remove the solar panel from where it's currently installed, sort them, package them, and arrange transportation, which can be quite challenging in practice.

This is why working with a solar equipment professional such as Solar Recycling is a much more desirable option. If you are looking to sell your used commercial utility scale solar panels and equipment in volume in Texas, California or Arizona.

Solar Recycling offers an easy way to sell your used solar panels in Miami, Orlando, Los Angeles, Phoenix, Houston, Santa Ana, New-York and other cities online, even long after your solar panel has its OEM warranty expired.

Sell Used Solar Panels

Solar Recycling strives to help you recoup as much of your initial solar panel investment by buying your used solar panels and equipment in Florida, North Carolina and more. Main goal is Net ZERO Waste with Net ZERO cost when possible.

If, for some reason, Solar Recycling cannot recover any value on your solar panels (i.e., if it's broken beyond repair, then it can offer a downstream recycling service and complete solar panel destruction service that comply with all environmental laws and regulations. Typically up to \$50 per panel plus shipping expenses.
