Senegal residential solar

As per SENELEC's (national electricity company of Senegal) current rate, the price of electricity for households in Senegal is 0.2223 USD/kWh. The electricity price for businesses is 0.3136 USD/kWh.⁴

As per survey reports, nearly 55% of the population is connected to an electricity supply that worked most or all of the time. For 16 % of the respondents, the electrical connection worked about half of the time, occasionally, or never. Lastly, 29% of the individuals did not have a connection to the electric grid in the country.⁵

As of now, Senegal does not have a widely available and specific count of residential solar panel installations. However, there are efforts underway to increase solar energy adoption, driven by various programs and investments. However, under the government-backed World Bank Scaling Solar program, 60 MW was added to Senegal's domestic power generation last year alone through solar.¹⁴

Determining the average overhead cost of solar panel production in Senegal involves several factors. These include the costs of raw materials, labor, utilities, and administrative expenses. Here's a detailed breakdown based on available data:
