Sierra leone battery technologies

Infinity Power will work closely with the Ministry of Energy to conduct feasibility studies, obtain required permits and finalise Power Purchase Agreements (PPAs) with the Electricity Distribution and Supply Authority (EDSA).

The first phase of the development will focus on the creation of 200MW of renewable energy generation capacity. This will include the expansion of hydroelectric dam capabilities and the installation of both floating and ground-mounted solar PV systems.

Infinity Power chairman Mohamed Ismail Mansour stated: "This partnership underscores our continued dedication to strengthening the supply of sustainable energy across Africa, contributing to a bright energy future for Sierra Leone."

Sierra Leone Deputy Minister of Energy Dr Eldred Tunde Taylor stated: "Our mandate is simple: prioritise the expansion of our energy infrastructure by integrating renewable energy sources and enhance sector reforms to continue attracting investments."
