

Site hoppecke com hoppecke batteries inc

Since 1927, the family company has been developing and producing in Germany, and thanks to its leading research and development activities, it has all reliable and innovative storage technologies in its product portfolio.

Electric energy is required everywhere and in every applications. In this world, where everything becomes electrical, HOPPECKE is your partner and expert. We understand our customers and with our energy solutions (designed for safety and availability), we serve four principal areas of application: emission-free drives (trak), secured power supply (grid), storage of regenerative energies (sun) and railway and metro-systems (rail).

From the comprehensive product programme of batteries and cells to complete energy systems with the most modern charging technology, monitoring units and engineering to consumption dependent energy billing - our portfolio always contains the suitable product tailored to the individual customer requirements.

With the development of marketable, forward-looking energy storage solutions, HOPPECKE makes an important contribution to solve the social challenges that result from the implementation of the global climate protection goals.

With its headquarters in Brilon-Hoppecke and 22 subsidiaries, representative offices, partners and distributors as well as production and assembly facilities worldwide, the HOPPECKE Group has more than 2,000 employees and generates turnover of over EUR600 million.

Electric energy is required everywhere and in ever more applications. In this world, where everything becomes electrical, HOPPECKE is your partner and expert. We understand our customers and with our energy solutions, designed for safety and availability, we serve four principal areas of application: emission-free drives (trak), secured power supply (grid), storage of regenerative energies (sun) and railway and metro-systems (rail).

HOPPECKE Batteries is the largest producer of industry battery systems in European ownership. Since 1927, the family company has been developing and producing in Germany, and thanks to its leading research and development activities, it has all reliable and innovative storage technologies in its product portfolio.

Mobile energy solutions for the supply of the traction of devices, machines and vehicles used for transporting goods and tool as well as persons. (Exception railway and metro systems, see rail).

Stationary energy solutions for ensuring the supply quality of electrical supply grids, for securing the power supply of systems in case of malfunctions or failures in the grid, for the operation of emergency power

lighting systems as well as for starting (emergency power) generators.

Stationary energy solutions for the increase of the self-usage of electrical energy from renewable energy sources in on-grid applications as well as for the development of off-grid power supplies.

power: energy storage technologies in the form of cells, blocks and modules powerpack: Battery units incl. necessary accessories such as supports, connectors, plug connector system, end cable, etc.

Components from the fields: battery accessories (e.g. electrolyte level measurement and electrolyte circulation, recombiners), energy converters (e.g. charging devices, energy supply units), battery handling (e.g. racks, changing system) monitoring and management (e.g. data recording, battery and energy management)
