SMA has partnered with selected distributors in the home, business and off-grid segments in the solar industry. SMA Authorised Distribution Partners are our partners who purchase full range of products and services directly from SMA, with a national footprint in the United Kingdom and Ireland, and receive technical and sales training on a regular basis from SMA. Solar professionals will ultimately benefit from increased product availability, extensive service and support, and greater access to professional technical resources through SMA's Authorised Distribution Partners.

Our innovative solutions for solar and storage applications, intelligent energy management systems and modern charging solutions for e-vehicles enable people and companies around the world to achieve greater energy independence. Together with our partners and customers, we are shaping the energy transition. For a climate-friendly, sustainable future.

Right from the start, with a focus on clean future. With environmentally friendly production, through a fair and honest business policy, in day-to-day working life and beyond.

SMA Solar UK Ltd is conveniently located in Milton Keynes, easily accessed via the UK motorway network, between the M1 and A5. Milton Keynes is midway between London (50 miles) and Birmingham (70 miles).

London Luton (30 minutes by road), Birmingham (1 hour by road), Heathrow (1 hour and 30 minutes by road) and London Stansted (1 hour and 30 minutes by road) airports are all within easy reach of Milton Keynes. All have regular scheduled flights to all parts of the UK, Europe and International destinations.

Milton Keynes Central station is on the main Intercity routes from London Euston, Birmingham, Manchester and Glasgow with regular service intervals. SMA Solar UK Ltd is just a 10 minute walk.

At junction 14, take the A509 exit to Milton Keynes/Newport Pagnell at the 1st roundabout take the 3rd exit onto A509, at the next 2 roundabouts take the 3rd exit on to H5/Portway/A509, for the next 6 roundabouts take the 2nd exit and stay on H5/Portway/A509. At the next roundabout take the 1st exit on to Witan Gate, turn right on to Silbury Blvd then left on to Upper Forth Street, turn left and the destination will be on your right. Parking is metered and machines are around the parking area.

Electric cars - and therefore EV Charging points - are already flourishing in homes and streets across the UK, accelerated by an interesting grant scheme. With a high proportion of home PV owners opting for plug-in vehicles, you are probably already receiving requests (and questions) from your customers to install home charging stations. Below is our advice to support you in providing them the best service.

The Government is accelerating their efforts to make the UK carbon-neutral by 2050, by bringing forward the ban on petrol and diesel powered vehicles forward to 2030. Part of their many initiatives is the EVHS which provides grants for home charging points installed and has very simple and straight forward eligibility.

Under the scheme customers can get up to £350 (incl VAT) towards purchase and installation of a charge point. Simply they just need to have an approved plug-in vehicle- including leased or company cars, have off-street dedicated parking and choose to install a pre-approved charge point. The grant is then claimed by you, the Installer after installation is complete.

If your customer lives in Scotland, additional funding may be available from the Scottish Government via the Energy Saving Trust, and if they are in the Republic of Ireland check the details here.
