Site victronenergy com victron marine inverters

Before we start on the details, if you haven't seen it yet, make sure to check the v3.50 blog post as well as the related slide deck with more detailed information including troubleshooting tips.

Lastly, before posting, preferably first revert to the latest official release, to double check if the issue you're seeing was present there as well. Regressions require a different treatment than other issues and bugs. And let us know if you did that, and what the difference is. A perfect report contains:

It fixes a bug that was introduced per v3.50 wrt Remote Console (Classic UI) and Furuno Marine MFDs; and also (mostly) fixes the often reported issue related to grid showing as disconnected while its not in systems using energy meters.
