

Small solar power bank

Small solar power bank

Introducing the Photon, the world's smallest portable solar charger, perfect for hiking and outdoor enthusiasts. Equipped with 5 small solar panels featuring high-efficiency photovoltaic cells and an integrated powerful power bank with a USB port, the Photon is not only an eco-friendly and compact solar charger, but also a versatile solar power source to charge your smartphone, camera, and all your other electronic devices during your outdoor adventures.

Thanks to its innovative solar charger models, the Photon ensures optimal charging time by fully utilizing the solar energy captured by its photovoltaic panels. Smart charge controllers ensure a constant and stable energy flow, optimizing the conversion of solar light into electricity. This not only enables fast charging of your smartphone but also meets the energy needs of your tablets and cameras, making the Photon an ideal companion for outdoor adventures.

The foldable solar panels of the Photon add to its portability, allowing for easy and convenient transportation. Whether you're hiking, camping, or traveling, the Photon unfolds quickly to capture available solar energy and convert it into usable electricity. Additionally, the integrated USB port offers universal connectivity, making it easy to charge various electronic devices on the go.

In summary, the Photon embodies the convergence of sustainability, compactness, and efficiency in the field of portable solar chargers. Recharge your electronic equipment effortlessly while using a renewable energy source during your outdoor expeditions with the Photon, the ideal choice for those seeking an eco-friendly and convenient solution.

You can also choose for UPS or GLS shipping in order to get your package faster. Rates are calculated at the checkout. NB: For Countries outside EU buying items ex. VAT, be aware you have to pay import taxes according to the laws of that specific country. In case of returns, we are not able to return any duties or taxes, as this is paid to and handled directly between you (the customer) and your country.

Return policy If you want to change a product into another size, color etc, please contact us so we are able to reserve the new item in our stock immediately. You are always entitled to an exchange or refund within 14 days after you have received your package, as long as the item has not been used. All original packaging, price labels etc. shall be returned with the product without having been tampered with.

Weighing a mere 220 grams and folding down to a small wallet format, the Photon solar power bank is the smallest solar charger that exists. It is perfect for campers, hikers, climbers and cyclists who want enough power to charge their smartphone quickly but who need to keep the weight they carry to a bare minimum.

The Photon has an integrated power bank to store the energy produced by the solar panels in the sun. This

Small solar power bank

allows you to charge the photon during the day and keep using when the sun is down. The capacity of the power bank allows up to 2 smartphone charges.
