BANDAR SERI BEGAWAN: Brunei plans to set up a 30MW new solar power plant to ramp up to 200MW of the country's solar energy by 2025, according to a senior official of Brunei Darussalam.

During the meeting of the 20th session of the Legislative Council, Brunei's Second Minister of Defence Awang Halbi unveiled the plan for the new solar plant, which aims to be operational by 2025, local media The Scoop reported on Monday (March 4).

Brunei is renowned for its abundant oil and natural gas resources. In recent years, the Brunei government has been committed to developing renewable energy such as solar power to promote energy structure and economic diversification. - Xinhua

The new solar farm will contribute to Brunei's target of generating 100 MW of solar energy by 2025, energy minister YB Dato Seri Setia Dr Hj Mat Suny Hj Md Hussein told Legislative Council (LegCo) members during a meeting on February 3.

Local companies such as Brunei Shell Petroleum (BSP) and Berakas Power Company have already installed solar photovoltaic (PV) technology earlier this year, the minister added.

It was previously reported that 7,000 solar panels would be installed to power BSP's headquarters, equivalent to the electricity consumption of about 600 households per year.
