The Swedish solar energy market is expected to have an installed capacity of 2,178 MW by the end of the base year. It is expected to register a CAGR of more than 23.3% during the forecast period.

Solar energy is a type of renewable energy in which solar panels are used to generate electricity. Solar panels deployed on rooftops or mounted on the grounds are utilized effectively by end users, including residential, commercial & industrial (C&I), and utilities. Solar energy has become the fastest-growing renewable energy source owing to the country's supporting government initiatives and surging investments in renewable energy projects.

The Swedish solar energy market is segmented by location of deployment (rooftop, ground-mounted) and end user (residential, commercial, and industrial (C&I), utility). The report offers the market size and forecasts in terms of installed capacity in MW for all the above segments.

The Swedish solar energy market is moderately fragmented. Some major players in the market (in no particular order) include HPSolartech AB, ABB Ltd, Exeger Sweden AB, InnoVentum AB, and Vattenfall

Solar energy companies sweden

AB.

Sweden is a world-leading country when it comes to bioenergy. Currently, almost 54.6 percent of Sweden's energy production comes from renewable sources. Sweden is also the first country in Europe to meet the renewable energy targets set by the EU for 2020. Renewable Energy Companies in Sweden also played a huge role in this.

They claim that their development and implementation of green technologies have led to this achievement. Sweden didn't just achieve this height but achieved Eight years ahead of schedule. Therefore, renewable technologies are used widely in the country across all sectors.
