

Solar grant ghana

Solar grant ghana

The U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) supports funding opportunities across its research areas. Following an open, competitive solicitation process, these funding opportunities encourage collaborative partnerships among industry, universities, national laboratories, federal, state, and local governments and non-government agencies and advocacy groups. Solicitations may include financial or technical assistance. Learn more about how to apply for a funding opportunity.

New EERE eXCHANGE Log-In Process: To make the sign-in process more secure, the EERE Funding Opportunity Exchange (eXCHANGE) has been updated to integrate with Login.gov--a secure service used by the public to sign into participating government agencies. All potential applicants and reviewers must have a Login.gov account to apply to open opportunities. Please read the MFA Quick Guide for more information.

Biden-Harris Administration Announces \$7 Billion Solar for All Grants to Deliver Residential Solar, Saving Low-Income Americans \$350 Million Annually and Advancing Environmental Justice Across America

EPA announces 60 selectees under Greenhouse Gas Reduction Fund grant competition to deliver solar to more than 900,000 low-income and disadvantaged households nationwide through the President's Investing in America agenda

"Today we're delivering on President Biden's promise that no community is left behind by investing \$7 billion in solar energy projects for over 900,000 households in low-income and disadvantaged communities," said EPA Administrator Michael S. Regan. "The selectees will advance solar energy initiatives across the country, creating hundreds of thousands of good-paying jobs, saving \$8 billion in energy costs for families, delivering cleaner air, and combating climate change."

"Solar is the cheapest form of electricity--and one of the best ways to lower energy costs for American families," said John Podesta, Senior Advisor to the President for International Climate Policy. "Today's announcement of EPA's Solar for All awards will mean that low-income communities, and not just well-off communities, will feel the cost-saving benefits of solar thanks to this investment."

"Sunlight is powering millions of homes across the nation, and we're working hard to ensure Americans everywhere can benefit from this affordable clean energy resource," said U.S. Secretary of Energy Jennifer M. Granholm. "DOE is proud to work alongside our partners at EPA and across the Federal government to help communities access the limitless energy of the sun to light their homes and power their businesses."

"The United States can and must lead the world in transforming our energy systems away from fossil fuels," said U.S. Senator Bernie Sanders (VT). "The Solar for All program - legislation that I successfully introduced - will not only combat the existential threat of climate change by making solar energy available to working

class families, it will also substantially lower the electric bills of Americans and create thousands of good-paying jobs. This is a win for the environment, a win for consumers, and a win for the economy."

To date, many of the 60 selected Solar for All applicants have supported low-income and underserved communities in installing innovative residential solar projects. With this new funding, selectees can launch thousands more projects like these throughout every state and territory in the nation:

EPA anticipates that awards to the selected applicants will be finalized in the summer of 2024, and selected applicants will begin funding projects through existing programs and begin expansive community outreach programs to launch new programs in the fall and winter of this year. Selections are contingent on the resolution of all administrative disputes related to the competitions.

EPA will host informational webinars as part of the program's commitment to public transparency. EPA has scheduled a public webinar for the Solar for All program, and registration details are included below. Information on other GGRF webinars can be found on EPA's Greenhouse Gas Reduction Fund Engagement Opportunities webpage.
