Solar lamp

There are fixing screws with the light, so ideally these would need to be screwed down to secure the panel. As you say we would not recommend adhesive pads or any other adhesive alternative due to the weather conditions it would not remain stable.

Introducing the Seattle Solar USB Table Light: where nature-inspired design meets modern convenience. Illuminate your surroundings with ease thanks to the built-in downlight which emits a soft, atmospheric glow. Whether you're unwinding after a long day or hosting a lively gathering, the Seattle effortlessly sets the mood. With adjustable colour temperature and brightness levels, you can tailor the ambience to suit any occasion. Choose from warm white, cool white or a blend of the two using the innovative touch-sensitive button.

Elevate your space with the Seattle Solar USB Table light. Meticulously crafted, this nature-inspired design comes with an oak wood-effect finish with a built-in down light, providing an atmospheric glow. This lantern has an integrated solar panel, plus an additional USB-C charging port to ensure you'll always have light when you need it.

Effortlessly adjust the ambience to complement every moment, from tranquil relaxation to busy gatherings with the cosy warmth of warm white, stunning cool white or the captivating blend of the two. Simply use the innovative touch-sensitive button to switch between colour temperature and brightness level with ease.

The Seattle Lights are optimally designed for indoor/outdoor use, even in partially lit environments. However, to conserve battery life, it's recommended to turn them off when not in use. Should you forget, the lights will automatically power down once the battery is depleted. Conveniently, recharging is hassle-free. Simply connect the lights to a USB charger to quickly restore full battery power, ensuring they are ready for your next use.
