

Solar water pumps in ghana

Solar water pumps in ghana

IWMI West Africa has been exploring solar irrigation initiatives for some time now and we are very enthused to say having a reliable partner from the private sector has been absolutely phenomenal in aiding us draw the right lines in promoting irrigation in the communities.

We took a big chance to work with Pumptech Limited to lead an innovative water supply systems to various small towns in Ghana and it has paid. PTL has proven its reliability, resilience, excellence and mastery in the industry. Their services are worth every investment resource.

As a leading provider of water solutions, Pumptech Limited specializes in the supply and installation of solar-powered water pumps and systems. These systems are designed to provide a reliable and sustainable source of water in areas where grid power is unavailable or unreliable.

We offer an integrated end-to-end service: developing, structuring finance, building and operating solar projects at commercial and utility scale. And we work with partners to bring solar and storage to their customers' homes.

The solar-powered water pumps and systems offered by Pumptech Limited are highly efficient and require very little maintenance, making them a cost-effective and eco-friendly solution for both domestic and commercial applications. The company's team of experienced engineers and technicians work closely with their clients to identify their specific water needs and design a system that meets those needs.

From small-scale solar pumps for household use to large-scale commercial systems, Pumptech Limited has the expertise and resources to provide their clients with a solution that meets their needs and exceeds their expectations. With a strong commitment to quality and customer satisfaction, Pumptech Limited is dedicated to ensuring that their solar-powered water pumps and systems provide their clients with a reliable and sustainable source of water for many years to come.
