## Solaredge inverter parts

Hi I have a 3800kw inverter (newer version no display screen) with a damaged upper housing cover/lid. I just need the upper cover with the allen screws but I haven't had any luck tracking down a replacement. Is there anyone out there that can help me out? I also may be willing to buy another inverter for parts but I would rather just get a new part if possible.

The SE7800A-US inverter is part of SolarEdge's larger fan-cooled single-phase inverter series. These are designed to provide higher-power systems at a lower cost than multiple small convection cooled inverters.

The SolarEdge SE7600A-US inverter is designed with sophisticated digital control technology with efficient power conversion architecture. This innovation achieves superior solar power harvesting and best-in-class inverter reliability for home grid-tie solar system applications.

The fixed-voltage technology ensures the SolarEdge SE7600A-US solar inverter is always working at its optimal input voltage over a wider range of string lengths and regardless of the environmental conditions of your solar system.

The SolarEdge power optimizer is connected by installers to each module or embedded by module manufacturers, replacing the traditional solar junction box. Therefore, it must be as reliable as the module itself with the ability to withstand the same environmental conditions to which the module is exposed.

As part of these efforts, tens of thousands of components have been evaluated in accelerated life chambers (burn-in, thermal cycling, humidity and so forth) as well as hundreds of products in field tests and stress tests. These tests have run for the equivalent of over 100 years (well over the expected life of photovoltaic systems). The lessons learned are invaluable and as a result, SolarEdge produces systems with unsurpassed reliability.

Solar Electric Supply not only supplies the latest SolarEdge products at a discount price, we also have a low solar system cost for systems designed specifically for SolarEdge optimizer solar systems.

Systems include inverters, roof or ground mount, solar panel cables, disconnects and breakers. We support our customers in the US with friendly knowledgeable staff that is here to help with your SolarEdge SE7600A-US inverter system questions.
