Stockholm residential energy storage

With the subscription to the pveurope newsletter I agree to be informed about interesting offers of Alfons W. Gentner Verlag GmbH & Co. KG. This agreement can be revoked and you can unsubscribe at any time. For further information please see the privacy policy.

Step into the era of smart energy management with Flower Hub, optimizing residential batteries that empowers homeowners with advanced control over their flexibility services and enabling extra revenue streams. Each Flower Hub is contributing to building a reliable energy system with distributed resources actively participating with flexibility. Our visionary approach establishes Flower as a leader in shaping the residential energy landscape.

Empowered by our cutting-edge forecasting, optimization, and trading software, we open the doors for all energy assets to actively contribute to stabilizing the uncertainties within the energy system. This not only enhances grid resilience but also generates additional revenue streams for asset owners.

Expanding upon and harnessing our core capabilities, we are rapidly emerging as a leading developer of grid-scale Battery Energy Storage Systems (BESS), earning the trust of grid owners throughout Europe.
