Super capacitor energy storage system

Baode Lin, Energy management strategy for super capacitor energy storage system based on phase shifted full bridge converter, International Journal of Low-Carbon Technologies, Volume 16, Issue 3, September 2021, Pages 1077-1086, https://doi /10.1093/ijlct/ctab038

Oxford University Press is a department of the University of Oxford. It furthers the University"s objective of excellence in research, scholarship, and education by publishing worldwide

Feature papers represent the most advanced research with significant potential for high impact in the field. A Feature Paper should be a substantial original Article that involves several techniques or approaches, provides an outlook for future research directions and describes possible research applications.

Editor"s Choice articles are based on recommendations by the scientific editors of MDPI journals from around the world. Editors select a small number of articles recently published in the journal that they believe will be particularly interesting to readers, or important in the respective research area. The aim is to provide a snapshot of some of the most exciting work published in the various research areas of the journal.
