

Victoria energy storage for backup power

Victoria energy storage for backup power

We acknowledge and respect Victorian Traditional Owners as the original custodians of Victoria's land and waters, their unique ability to care for Country and deep spiritual connection to it. We honour Elders past and present whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

We are committed to genuinely partner, and meaningfully engage, with Victoria's Traditional Owners and Aboriginal communities to support the protection of Country, the maintenance of spiritual and cultural practices and their broader aspirations in the 21st century and beyond.

The battery has a 250 MW grid service contract with AEMO under direction from the Victorian Government. It supports Victoria's clean energy transition and secure reliable, affordable power for Victorians.

We create preliminary designs & initiate feasibility studies to identify site constraints. We commence early engagement with Traditional Owners, neighbours, local council and the community. We hold community information sessions locally.

Extensive studies & surveys are undertaken to create detailed project design before submitting a Development Application (DA) to the Victorian Government. Ongoing community and governmental consultations help refine project plans. We initiate grid connection enquiries.
