

Yaounde energy conservation

Below is a directory/list of NGOs, charities and non-profits working on protecting environment. They run awareness campaigns for climate change and pressurize governments to adopt policies for reducing carbon emissions. Many are also focused on adopting renewable energy solutions. in Yaounde. Total Results = 16

CoM SSA is co-funded by the European Union (EU), the German Federal Ministry for Economic Cooperation and Development (BMZ) and, the Spanish Agency for International Development Cooperation (AECID).

This website was created and maintained with the financial support of the European Union (EU), the German Federal Ministry for Economic Development and Cooperation (BMZ), and the Spanish Agency for International Development Cooperation (AECID). Its contents are the sole responsibility of Covenant of Mayors in Sub-Saharan Africa and do not necessarily reflect the views of the European Union or the other co-funders.

The EcoClean Environnement cooperative is one of the players in sanitation in Cameroon through the pre-collection and recovery of rubbish in the city of Yaounde. It strengthens its capacities thanks to the support of programs such as "Action Plan for Access to Sustainable Energy and Climate (PAADC)"; "Plan d'Action en Faveur d'un Accès à une Energie Durable et du Climate) or alternatively training programs from organisations such as ERA Cameroon.

The cooperative recovers more than 19.1 tons of garbage on average per month, which it sorts, recycles and deposits at the Urban Community's voluntary collection points for final disposal. This waste represents only 2% of what the city can produce per month. A quantity is recovered by the company in charge of the collection and the rest ends up in ravines, gullies, waterways, or next to homes as a litter dump.

Through their action of recovering and recycling rubbish, the EcoClean Environnement cooperative has understood that waste represents an added value in the economy of a country like Cameroon, thanks to large-scale pre-collection and recovery of all sorts. Indeed, these actions are very important commitments. Firstly for the preservation of ecosystems, secondly for the reduction of greenhouse gas emissions, such as the methane produced by the uncontrolled landfills encountered in Cameroon, and finally for the economic action of the very profitable waste sector.

The objective is to show the environmental and economic advantages related to the proper management of sustainable waste in developing countries and more particularly in Cameroon.

EcoClean Environnement is a cooperative for the pre-collection and recovery of rubbish. It is an organization that aims on one hand to promote health and hygiene within Cameroonian society and on the other hand seeks to implement a circular economy with its actions.

To start with it involves a global cleaning up of unhealthy spaces and removal of locally produced waste in order to preserve the environment and fight against global warming and epidemics linked to health problems. Afterwards, it is a matter of increasing potential employment of young people, training the population in actions contributing to sustainable development, and finally promoting a circular economy.
